Mouse and Moon Creations
Principle consultant/creative director
Portland, OR
2014 - Present

OpenSesame
Senior frontend developer/design engineer
Portland, OR
2019 - 2022

 Dept. of English, Writing

🇺🇸 en-US (native)

🇨🇿 cs-CZ (basic proficiency)

🇮🇹 it-IT (mostly forgotten)

Technologies

- ✅ Javascript/Typescript
- ✅ CI/CD
- ✅ Material design
- ✅ Figma
- ✅ Storybook
- ✅ Node/NPM
- ✅ AWS
- ✅ Webpack/Rollup/Babel
- ✅ REST/GraphQL
- ✅ Frontend frameworks
  - Astro
  - React/Preact
  - Angular
  - Vue
- ✅ Site generators
  - Eleventy
  - Jekyll
  - Hugo

Accomplishments

- ✅ Successfully designed and architected the next generation UI in a monorepo for several clients between 2018 and 2022, resulting in evolving patterns consistent with emerging micro-frontend patterns.
- ✅ Optimized unit testing with Jest in NPM packaged software.
- ✅ Improved compatibility and tree-shaking in NPM packages.
- ✅ Led a team creating a JSS-based themable design system from scratch that connected Figma design tokens to a distributed package consisting of a theming engine, component library, and image optimization system. 2021-2022
- ✅ Participated in building a world-class design team by interviewing and recommending hiring of designers and developers, then served as lead design engineer supporting Angular and React apps.
- ✅ Architected and developed a universal themable design system that works with any framework, including React, Angular, Vue, or no framwork, such as with Mustache templates. 2022
- ✅ Successfully designed and implemented a headless theming engine for use with any component library or a headless component library. 2021
- ✅ Led the team upgrading state management in a legacy Angular application by implementing an NGRX store with RxJs. 2019
- ✅ Created and built an Angular component library using Material Design. 2019-2020
- ✅ Applied architecture and UI/UX design skills to build and maintain a headless blog with React, Ghost, and Express. 2017-2019
- ✅ Successfully built, designed and led production of multiple high-traffic, consumer-facing, large scale enterprise applications using React, Angular, and custom frameworks. 2012-2017
- ✅ Designed and led the creation of a UI framework in the days before React. 2012
- ✅ Wrote much documentation and many case studies.
- ✅ Taught Javascript, writing, and photography at various times.
